

Funding Opportunity: Breakfast Clubs

Powering young minds through healthy breakfasts

From September 2025, all States primary schools will run a breakfast club service as part of Education's Wrap Around Care Policy.

We are looking to work with States schools, on a first come first serve basis, to:

- understand the costs associated with running this service
- help review the club's provision against local Food Standards
- support the school to introduce any changes that would bring the club in line with these standards

Participating schools will receive some funding towards the running of their breakfast club.

Additional funding will also be available to enable schools to trial healthier swaps.
